핀치밸브 제어 예시

Example of Pinch Valve Controls

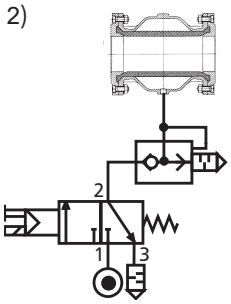

1)

3/2웨이 솔레노이드 밸브 전류가 흐르지 않을 때 열림(NO)

3/2-way solenoid valve currentless open (NO)

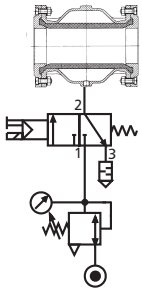

2)

3/2웨이 솔레노이드 밸브(NC) 전류가 흐르지 않을 때 닫힘, 급속 배기 밸브 포함

3/2-way solenoid valve (NC) normally closed with quick exhaust valve

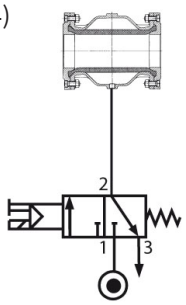

3)

3/2웨이 솔레노이드 밸브(NC) 전류가 흐르지 않을 때 닫힘, 압력 조절기 포함

3/2-way solenoid valve (NC) normally closed with pressure regulator

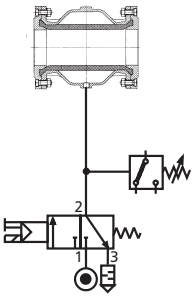

4)

흡입 이송 시 진공 보상: 진공 펌프 또는 바이패스를 3번 포트에 연결

Conveying by suction:
Connect vacuum-pump or by-pass at connection 3

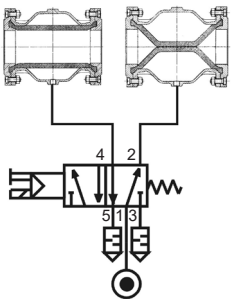

5)

3/2웨이 솔레노이드 밸브 전류가 흐르지 않을 때 열림(NC), 압력 스위치 포함

3/2-way solenoid valve normally closed (NC) with pressure switch

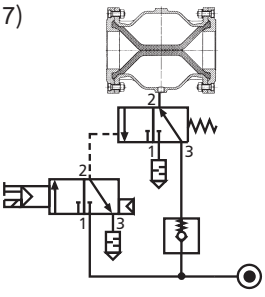

6)

5/2웨이 솔레노이드 밸브, 교대 제어용

5/2-way solenoid valve for various regulation

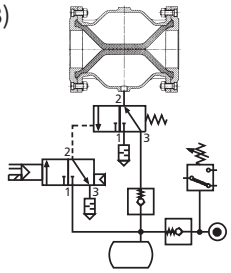

7)

압축공기/전원 차단 시:
핀치밸브가 닫힌 상태를 유지합니다.

For pressure power shut down:
Pinch valve remains in closed position.

8)

압축공기/전원 차단 시:
핀치밸브는 열린 상태에서도 닫힙니다(압축공기 어큐뮬레이터).

For pressure power shut down:
Pinch valve can close in open position (air tank).
